# **Important Notice:**

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you visit www.onesurvey.org (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

# SINGLE Survey

A report on the condition of the property, with categories being rated from 1 to 3.

### PART 1 - GENERAL

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. <sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 $\overline{\mathcal{M}}$ 

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

# 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

# 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

# 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

# 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.10 **DEFINITIONS**

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

# PART 2 – DESCRIPTION OF THE REPORT

### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

# 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.* 

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 <u>Category 1</u>: No immediate action or repair is needed.

**WARNING**: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

#### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an

arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- \*There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- \*There are no particularly troublesome or unusual legal restrictions;
- \*There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

# **1. INFORMATION AND SCOPE OF INSPECTION**

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subject property comprises a detached villa, two storeys in height.	
Accommodation	Ground floor - entrance vestibule, hallway, living room, dining room, kitchen and separate WC apartment.	
	First floor - three bedrooms and shower room with WC.	
Gross internal floor area (m2)	110 square metres.	
Neighbourhood and location	The property is located in a popular residential area developed with various types of property. It is conveniently located in relation to local facilities and amenities.	
Age	53 years or thereby.	
Weather	Overcast and dry.	
Chimney stacks	Visually inspected with the aid of binoculars where required.	
	The chimney stack is of rendered brick construction and is protected at roof level by lead flashing.	
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where required. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Flat roofs have a limited life and depending on their age and quality of workmanship can fail at any time.	

	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so. Roofs are prone to water penetration during adverse weather but it is not always possible for surveyors to identify this likelihood in good or dry weather. All roofs should be inspected and repaired by reputable tradesmen on an annual basis and especially after storms. The roof is pitched, timber framed, boarded with foil backed plasterboard sarking and overlaid with concrete tiles. There is a flat felt clad roof over the rear projection.
Rainwater fittings	Visually inspected with the aid of binoculars where required.
	Gutters and downpipes are of PVC.
Main walls	Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected. The outer walls are of cavity brick work/block work construction, with an external leaf of rendered brick work and incorporating weatherboard features.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available. Random windows were opened and closed where possible. Doors and windows were not forced open. The windows are of double glazed replacement type.
External decorations	Visually inspected.
	UPVC cladding at eaves level. The weatherboard features have a wood stained finish.
Conservatories / porches	None.
Communal areas	None.
Garages and permanent outbuildings	Visually inspected. There is a detached single car brick garage with flat felt clad roof.

Outside areas and	Visually inspected.
boundaries	The property occupies a corner plot. There is a slabbed driveway. The garden grounds are predominantly laid to grass, slabs, shrubs and decorative gravel. The boundaries where seen are enclosed in brick walls, timber fencing and hedges.
Ceilings	Visually inspected from floor level.
	The ceilings are of plasterboard.
Internal walls	Visually inspected from floor level. Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	The inner surface of the main walls are plastered on the hard.
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted. Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point. Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch. Floors are of suspended timber construction laid off timber joists.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved. Kitchen units were visually inspected excluding appliances.
	The kitchen is fitted with white floor and wall units.
	Door surrounds and skirting boards are of timber.
Chimney breasts and fireplaces	Visually inspected. No testing of the flues or fittings was carried out.
	The living room houses a living flame effect coal gas fire.
Internal decorations	Visually inspected.

	Decorated as required.	
Cellars	Not applicable.	
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on. Mains connected.	
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on. Mains connected.	
Water, plumbing and bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation. No tests whatsoever were carried out to the system or appliances. Concealed areas around baths and shower trays cannot be inspected however water spillage over a period of time can result in unexpected defects to hidden parts of the building fabric. Mains connected. The downstairs cloakroom consists of a WC and wash hand basin. The upstairs shower room comprises a WC, wash hand basin and shower cubicle.	
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected. No tests whatsoever were carried out to the system or appliances. There is a warm air heating system with ducts. The landing cupboard housed the insulated copper cylinder with thermostat.	

Drainage	Drainage covers etc were not lifted. Neither drains nor drainage systems were tested.	
	Mains connected.	
Fire, smoke and burglar alarms	Visually inspected. No tests whatsoever were carried out to the system or appliances. The new Fire and Smoke Alarm Standard came in to force in February 2022. This new standard requires a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also needs to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon-fuelled appliance such as a boiler, open fire or wood burner a carbon monoxide detector is also required. The purchaser should satisfy themselves in this regard.	
	There are smoke, heat and carbon monoxide alarms in the property.	
Any additional limits to inspection	An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive. Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way. At the time of the inspection, the property was occupied and fully furnished with fitted floor coverings throughout. It was inspected externally and internally from ground/floor level. Limited access was gained to the loft. No sub floor

# 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category:	3
Notes:	Cracking was noted at external rendering. This is most noticeable at the rear extension. Plaster cracking was also noted internally. Repairs are required to the rear diningroom extension. A report has been obtained by Clancy Consulting Structural Engineers (see Additional Documents), who have stated that the original two storey house appears structurally sound although recommends either demolishing or underpinning the rear diningroom extension. For the purposes of the report, we have made an allowance for this and have excluded the diningroom from our valuation.

Dampness, rot and infestation	
Repair category:	
Notes:	No signs of any significant dampness, rot or infestation were noted during our limited inspection of the property.

Chimney stacks	
Repair category:	2
Notes:	General weathering was noted at the chimney head and associated lead flashing. It will require ongoing maintenance.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Roofing including roof space	
Repair category:	2
Notes:	The roof covering is the original and is showing signs of general weathering. Moss growth was noted at roof tiles in places. Within the loft, condensation staining was noted at plasterboard sarking. Some peeling off of the foil backed coating was also noted at plasterboard sarking panels. General weathering was noted at the flat felt clad roof over the rear extension. Flat roofs are unsuited to the Scottish climate. It will require ongoing maintenance.

Rainwater fittings	6
Repair category:	
Notes:	No significant defects were noted at rainwater goods.

Main walls	
Repair category:	2
Notes:	Cracked and bossed render at external walls should be cut back and repaired as required.
	Cavity wall insulation has been introduced. It is therefore essential that the external walls are maintained in a wind and watertight condition.
	See also Section "Structural movement" above.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Windows, external doors and joinery	
Repair category:	2
Notes:	The windows are of an older style and show signs of general wear at operating mechanisms and handles. Some of the windows are stiff to open and close. It is anticipated that an incoming purchaser would install new double glazed replacement window units.

External decorations	
Repair category:	
Notes:	The external appearance of the property is satisfactory.

Conservatories / porches	
Repair category:	
Notes:	None.

Communal areas	
Repair category:	
Notes:	None apparent.

Garages and permanent outbuildings		
Repair category:		

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

	2
Notes:	Woodworm damage was noted at timbers in the garage.
	There is a felt clad roof over the garage. This will also require ongoing maintenance.
	Rot was also noted at the window timbers at the garage.

Outside areas and boundaries	
Repair category:	2
Notes:	Spalled/weathered brick work was noted at boundary brick walls.

Ceilings	
Repair category:	
Notes:	No significant defects were noted at ceilings.

Internal walls	
Repair category:	2
Notes:	Plaster cracking was noted at walls at the rear extension near the join where it meets the two storey section of the house. This area should be replastered/redecorated as required.

Floors including sub-floors

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Repair category:	1
Notes:	No significant defects were noted at the floors.

Internal joinery and kitchen fittings	
Repair category:	
Notes:	The kitchen units are of an older style although appear functional.

Chimney breasts and fireplaces	
Repair category:	
Notes:	Moisture meter tests at the chimney breasts revealed no evidence of significant dampness at the points of examination. No tests of the living flame effect coal gas fire were undertaken. Flue in use should be checked as a matter of routine prior to usage particularly where gas appliances are involved.

Internal decorations	
Repair category:	2
Notes:	The property would benefit from a scheme of internal redecoration in places.

Cellars	
Repair category:	

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Notes:	Not applicable.
--------	-----------------

Electricity	
Repair category:	2
Notes:	The electrical switch gear is housed in the entrance vestibule cupboard. There is an older style fuse box. The electrics would not comply with current regulations as there are no circuit breakers. The electrics should be tested and upgraded to contemporary standards by a reputbale firm of electrical contractors, preferably NIC/EIC registered.

Gas	
Repair category:	
Notes:	The gas meter box is located adjacent to the front door.

Water, plumbing and bathroom fittings	
Repair category:	2
Notes:	The WC apartment fitments appear to be the original and would benefit from being replaced. They however appear functional.

Heating and hot	water
Repair category:	
	The Johnson & Starley warm air unit is housed in the hall cupboard.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Notes:	It will require ongoing maintenance/annual servicing to remain effective.
	This type of warm air ducted system is not as popular as one with radiators. No tests of the central heating system were undertaken. It will require ongoing maintenance/annual servicing to remain effective. Current test certification should be exhibited.
	There appears to be asbestos sheeting at the base of the heating unit. This poses no risk if left in its current position although if it is to be removed, then specialist advice should be sought with regards to its safe removal/disposal.

Drainage	
Repair category:	
Notes:	Drainage is by gravity feed to the Local Authority sewer. Drainage covers were not lifted nor were any tests undertaken on the system.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information

Chimney breasts and fireplaces	1
Internal decorations	2
Cellars	
Electricity	2
Gas	1
Water, plumbing and bathroom fittings	2
Heating and hot water	1
Drainage	1

# Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

# Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

# **3. ACCESSIBILITY INFORMATION**

# **Guidance Notes on Accessibility Information**

<u>Three steps or fewer to a main entrance door of the property:</u> In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres</u>: For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground & First
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES [ ]NO
3. Is there a lift to the main entrance door of the property?	[ ]YES [x]NO
4. Are all door openings greater than 750mm?	[ ]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES [ ]NO
6. Is there a toilet on the same level as a bedroom?	[x]YES [ ]NO
7. Are all rooms on the same level with no internal steps or stairs?	[]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES [ ]NO

# 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

# Matters for a solicitor or licensed conveyancer

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

It is assumed that the property and its value are unaffected by any matters which would or should be revealed to a completing Solicitor by a local search/replies to usual enquiries or by any statutory notice or planning proposal.

It appears that the rear extension has been added at some time in the distant past.

# Estimated re-instatement cost (£) for insurance purposes

280,000

Two Hundred and Eighty Thousand Pounds

# Valuation (£) and market comments

225,000

Following a return in confidence to the market, properties are now generally selling well providing mortgage finance remains available and they are realistically priced.

We value the property vacant and in its present condition at the capital sum of Two Hundred and Twenty Five Thousand Pounds.

This report has been prepared as part of your instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising your lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

# **Energy Performance Certificate (EPC)**

# Scotland

Dwellings

#### 2 MERKLAND ROAD, AYR, KA7 4UQ

Dwelling type:	Detached house
Date of assessment:	06 June 2023
Date of certificate:	14 June 2023
Total floor area:	110 m <sup>2</sup>
Primary Energy Indicator:	328 kWh/m <sup>2</sup> /year

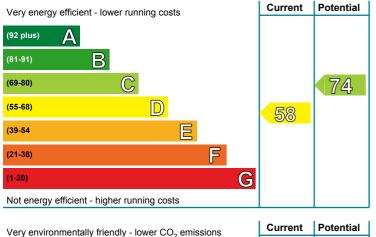

Reference number: Type of assessment: Approved Organisation: Main heating and fuel: 0120-2236-0260-2407-8025 RdSAP, existing dwelling Elmhurst Warm air, mains gas

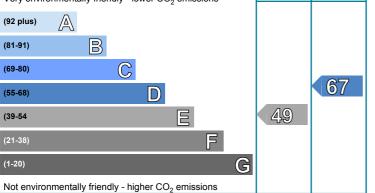

#### You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£9,237	See your recommendations
Over 3 years you could save*	£1,785	report for more information

<sup>\*</sup> based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

# **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (58)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

# Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide  $(CO_2)$  emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (49)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

# Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (suspended floor)	£800 - £1,200	£981.00
2 Solar water heating	£4,000 - £6,000	£360.00
3 Replacement glazing units	£1,000 - £1,400	£444.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282. THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

2 Merkland Road, Ayr, KA7 4UQ

# 2 MERKLAND ROAD, AYR, KA7 4UQ

#### 14 June 2023 RRN: 0120-2236-0260-2407-8025

# Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Cavity wall, filled cavity	★★★☆☆	★★★☆☆
Roof	Pitched, 270 mm loft insulation Flat, insulated (assumed)	★★★★☆ ★★★☆☆	★★★★☆ ★★★☆☆
Floor	Suspended, no insulation (assumed)	—	_
Windows	Fully double glazed	<b>★★★</b> ☆☆	★★★☆☆
Main heating	Warm air, mains gas	<b>★★★★</b> ☆	<b>★★★</b> ☆
Main heating controls	Programmer and room thermostat	<b>★★★</b> ☆☆	★★★☆☆
Secondary heating	Room heaters, mains gas	_	_
Hot water	From main system	★★★★☆	★★★★☆
Lighting	Low energy lighting in all fixed outlets	*****	*****

# The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

# The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

#### The calculated emissions for your home are 58 kg CO<sub>2</sub>/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 6.4 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.3 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

# Estimated energy costs for this home

Estimated energy costs for this nome						
	Current energy costs	Potential energy costs	Potential future savings			
Heating	£7,671 over 3 years	£6,279 over 3 years				
Hot water	£1,086 over 3 years	£693 over 3 years	You could			
Lighting	£480 over 3 years	£480 over 3 years	save £1,785			
Tot	als £9,237	£7,452	over 3 years			

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

# **Recommendations for improvement**

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving per year	Rating after improvement	
				Energy	Environment
1	Floor insulation (suspended floor)	£800 - £1,200	£327	D 62	E 54
2	Solar water heating	£4,000 - £6,000	£120	D 63	D 56
3	Replacement glazing units	£1,000 - £1,400	£148	D 65	D 59
4	Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£648	C 74	D 67

# Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

#### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

#### 1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

#### 2 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

#### **3 Replacement glazing units**

Replacing existing double-glazed units with new high-performance units. Building regulations require that replacement glazing is to a standard no worse than previous; a building warrant is not required. Planning permission might be required for such work if a building is listed or within a conservation area so it is best to check with your local authority.

#### 4 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

#### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

#### Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	15,750	N/A	N/A	N/A
Water heating (kWh per year)	2,799			

#### 2 MERKLAND ROAD, AYR, KA7 4UQ 14 June 2023 RRN: 0120-2236-0260-2407-8025

#### About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name:	Mr. Kevin Hay
Assessor membership number:	EES/008225
Company name/trading name:	Allied Surveyors Scotland Plc
Address:	3 Alloway Street Ayr KA7 1SP
Phone number:	01292 260509
Email address:	ayr@alliedsurveyors.com
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

### Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

#### PART 4.

# PROPERTY QUESTIONNAIRE

The owner of the property is required to complete this document which asks for information on the property such as 'Which council tax band?' etc.

## **Property Questionnaire**

## property questionnaire

4.					
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	[ ]YES [x]NO [ ]Don't know			
5.	Listed buildings				
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	[ ]YES [x]NO			
6.	Alterations/additions/extensions				
а	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	[]YES [x]NO			
	If you have answered yes, please describe below the changes which you have made:				
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	[ ]YES [ ]NO			
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.				
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:				
b	Have you had replacement windows, doors, patio doors or double glazing installed in your property	[x]YES [ ]NO			
	If you have answered yes, please answer the three questions below:				
	(i) Were the replacements the same shape and type as the ones you replaced?	[x]YES [ ]NO			
	(ii) Did this work involve any changes to the window or door openings?	[x]YES [ ]NO			
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):				
	Please give any guarantees which you received for this work to your solicitor or estate agent.				

7.	Central heating	
а	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).	[x]YES [ ]NO [ ]Partial
	If you have answered yes or partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).	
	Gas warm air	
	If you have answered yes, please answer the three questions below:	
	(i) When was your central heating system or partial central heating system installed?	
	Dont know	
	(ii) Do you have a maintenance contract for the central heating system?	[]YES [x]NO
	If you have answered yes, please give details of the company with which you have a maintenance contract	
	(iii) When was your maintenance agreement last renewed? (Please provide the month and year).	
8.	Energy Performance Certificate	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	[x]YES [ ]NO
9.	Issues that may have affected your property	
а	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	[]YES [x]NO
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	[ ]YES [ ]NO
b	Are you aware of the existence of asbestos in your property?	[ ]YES [ ]NO [x]Don't know
	If you have answered yes, please give details:	
10.	Services	
а	Please tick which services are connected to your property and give details of the supplier:	

	Services	Connected	Supplier
	Gas or liquid petroleum gas	Y	British Gas
	Water mains or private water supply	Y	Scottish Water
	Electricity	Y	British Gas
	Mains drainage	Y	Local Authority
	Telephone	Ν	
	Cable TV or satellite	Ν	
	Broadband	Ν	
b	Is there a septic tank system at your proper	ty?	[ ]YES [x]NO
	If you have answered yes, please answer th below:	ne two questions	
	(i) Do you have appropriate consents for the your septic tank?	e discharge from	[ ]YES [ ]NO [ ]Don't know
	(ii) Do you have a maintenance contract for	your septic tank?	[ ]YES [ ]NO
	If you have answered yes, please give details of the company with which you have a maintenance contract:		
11.	Responsibilities for shared or common a	ireas	
а	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area? If you have answered yes, please give details:		[ ]YES [x]NO [ ]Don't know
b	Is there a responsibility to contribute to repa of the roof, common stairwell or other comm If you have answered yes, please give deta	e [ ]YES [x]NO [ ]N/A	
с	Has there been any major repair or replace the roof during the time you have owned the	• •	[ ]YES [ ]NO
d	Do you have the right to walk over any of your neighbours' property- for example to put out your rubbish bin or to maintain your boundaries? If you have answered yes, please give details:		ר [ ]YES [x]NO
e	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?		[ ]YES [x]NO

## property questionnaire

	If you have answered yes, please give details:	
f	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privatelyowned.) If you have answered yes, please give details:	[ ]YES [x]NO
12.	Charges associated with your property	
а	Is there a factor or property manager for your property? If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	[]YES [x]NO
b	Is there a common buildings insurance policy?	[ ]YES [x]NO [ ]Don't know
	If you have answered yes, is the cost of the insurance included in your monthly/annual factors charges?	
с	Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, for example to a residents' association, or maintenance or stair fund.	
13.	Specialist works	
<b>13.</b> a	Specialist works As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	[ ]YES [ ]NO
	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your	[]YES[]NO

## 1.0 Brief

- 1.1 Clancy Consulting Ltd was instructed by Graeme Lumsden of Black Hay Estate Agents, to carry out a structural appraisal of No. 2 Merkland Road, Alloway.
- 1.2 The inspection was requested as it has been noted there are cracks in the walls of the conservatory structure close to the junction with the main house.
- 1.3 No opening up or other disruptive investigations were made unless expressly noted within the text of the report.
- 1.4 The report is prepared specifically for the Client and his representatives in connection with his proposals. It is not for transmission in whole or in part to any third party and we bear no obligation to any such third party for its content without our express permission. Such permission will not be unreasonably withheld.

## 2.0 Inspection

- 2.1 The property was visited on 13 June 2023 by Mr N Orrock when access was gained to all apartments. No access was available into the roof space at the time of the visit.
- 2.2 None of the fabric of the building was opened up and we have not inspected woodwork or other parts of the structure, which were covered, unexposed or otherwise inaccessible. We are therefore unable to report that any such part of the property is free from defect.
- 2.3 No disruptive investigations took place therefore any defects noted in subsequent paragraphs were clearly visible.
- 2.4 Rot and infestation of timber components did not form part of the survey brief on this occasion.
- 2.5 Externally all elevations of the property were viewed from ground level only.

## 3.0 Ground and Mineral Support

- 3.1 No investigations were carried out in respect of ground conditions or mineral support as part of the survey.
- 3.2 Similarly, no investigations into existing foundations were carried out at the time of our inspection.

## 4.0 Description / Construction

- 4.1 The property is a detached 2 storey house. The ground floor consists of entrance hall, stair to 1st floor, lounge, kitchen, dining room, bathroom, and a single storey conservatory/day room extension located at the rear of the building. At 1<sup>st</sup> floor level there are 3 bedrooms and a bathroom.
- 4.2 The property is a cavity wall construction with a mix of dry dash render and horizontal timber cladding finish. The conservatory/day room consists of external cavity wall with a flat roof.
- 4.3 Floors are of suspended timber with boarding over.
- 4.4 The main roof is pitched and tiled.
- 4.5 The property is on a corner site at the junction between Merkland Road and Kersepark in Alloway.
- 4.6 Current site photographs and commentary are included in Appendix A.

### **5.0 Structural Condition**

5.1 Generally the property is in good condition.

#### INTERNAL

- 5.2 In the main house there are no structural issues. There is a slight vertical crack above the stair window on the front elevation however, it does not appear to be of recent origin.
- 5.3 The conservatory/day room extension is accessed from the living/dining room at the rear, and there is a step down into the room. The room itself has a large full height double window, with a sliding door to the patio, on the left-hand wall and a high level window on the right-hand wall. To the left side of the sliding door, adjacent to the join with the main house, there is a diagonal crack visible at approximately 1.0m up from floor level. There is also extensive rippling of the wallpaper at the join between the extension and the main house.
- 5.4 The extension has a timber lining on the ceiling and there appears to be a gap between the timber and the main house wall.
- 5.5 On the right-hand wall, there is significant vertical cracking, close to the join between the extension and the main house, which extends upwards. There is further rippling of the wallpaper at the extension/main house join on this side.

#### EXTERNAL

- 5.6 Main House Front (South) Elevation there are no obvious signs of structural distress on this elevation.
- 5.7 Main House Side (West) Elevation there are no obvious signs of structural distress on this elevation.

- 5.8 Main House Rear (North) Elevation there are no signs of structural distress on this elevation on the main house however, on the rear extension walls there is evidence of structural cracking on both return walls close to the join with the main house.
- 5.9 The west wall with the window and sliding door has low level horizontal cracking, along with high level diagonal cracking adjacent to the main house wall. The join between the extension and the amin house appears have been infilled with a flexible sealant and, looking at the extent of the remedial works, this appears to have been attempted a few times.
- 5.10 On the other return (east) wall, diagonal cracking extends out from the side of the window nearest the main house. Further low level horizontal cracking was also noted adjacent to the main house wall. Attempts have been made to infill some of these cracks with a flexible sealant however, they have re-opened.
- 5.11 Main House Side (East) Elevation there are no obvious signs of structural distress on this elevation.
- 5.12 During the inspection it was also noted that the external precast concrete step at the sliding door of the rear extension appears to have settled downwards away from the door threshold.

## 6.0 Conclusions

- 6.1 The building is generally in a good structural condition. There are no signs of structural distress in the main building in the vicinity of the rear extension.
- 6.2 The minor internal hairline cracking exhibited within the property is not significant and does not appear to be of recent origin.
- 6.3 The cracking noted at the conservatory/day room extension would indicate that there has been a downward movement of the external walls, which has resulted in the cracking and rippling wallpaper noted.
- 6.4 The cause of this cracking is possibly associated with some sub-soil issue that has caused the foundations to settle differentially from the main house, resulting in the movement noted.
- 6.5 Recommended Options to address the above issue with the conservatory/day room extension would be either of the following:
  - A) carry out intrusive ground investigations and CCTV drain surveys to try to determine cause of the problem, and then design suitable remedial underpinning works, with corresponding superstructure repairs, to resolve the issue.
  - B) Take down and remove the extension to underside of foundations, address the ground/drainage issue, and then re-build on suitably designed foundations.
  - C) Take down the extension and either infill the rear wall to include a double window or redevelop the rear with a full width extension.

Job No.: 14/17322 Rev: A

#### Appendix A Site Photos and Comments

Extension - cracks in right hand east return wall

Extension - cracks in right hand east return wall close up

Extension - left hand west return wall rippling wallpaper Extension - timber ceiling - gap at join with main house

External – east extension wall – cracks in render Infilled with sealant.

External – east extension wall – cracks in render Infilled with sealant.

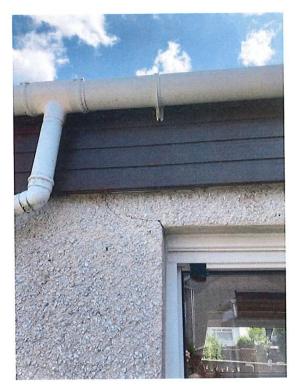

External -east extension wall - low level crack

External -east extension wall – high level diagonal crack

## 

External -west extension wall - high level crack

External -west extension wall – flexible sealant at wall join

External -west extension wall - high level crack

External -west extension wall - low level crack

External -west extension wall – step has settled away From threshold.
